07 About RapidCanvas

About G2

G2 stands as the world's leading and most trusted business software review platform, empowering technology buyers, investors, and analysts to make well-informed purchasing decisions. It distinguishes itself by leveraging an extensive and growing collection of over 500,000 verified user reviews, ensuring unbiased ratings derived from the opinions of real users and synthesized social data.

To maintain the integrity of its ratings, G2 employs a robust validation process, requiring reviewers to authenticate their identity and employer affiliation through LinkedIn accounts or verified business email addresses before reviews undergo manual scrutiny. This commitment to authentic, peer-based feedback, combined with data from public sources, positions G2 as an invaluable resource for those seeking to compare and select the optimal software solutions.

Data Science and Machine Learning Category

DSML Category

Data Science and Machine Learning (DSML) platforms are indispensable for businesses aiming to harness the transformative power of artificial intelligence to achieve a strategic advantage. These platforms deliver a holistic environment for the full lifecycle of machine learning models, from initial development and seamless deployment to ongoing management, effectively converting data into actionable insights. DSML platforms democratize AI adoption across organizations, offering tools that range from intuitive, visual interfaces with ready-to-use algorithms for users with basic skills, to sophisticated coding environments for advanced developers. This spectrum of capabilities ensures that businesses of all sizes and technical proficiencies can unlock the potential of AI.

These platforms empower companies to engineer cutting-edge solutions with advanced functionalities, including image and voice recognition, natural language processing, and personalized recommendation engines. By making machine learning more accessible, DSML platforms fuel innovation across diverse business functions, from enriching customer interactions and streamlining intricate operations to enabling data-informed strategic decisions at scale.

Currently, G2 lists 249 platforms in the Data Science and Machine Learning (DSML) category, showcasing the breadth and depth of solutions available to businesses today around the world.

For a product to be categorized by G2 as a Data Science and Machine Learning (DSML) Platform, it must meet the following criteria:

Data Connectivity

The platform must provide developers with a mechanism to connect data sources to machine learning algorithms, enabling the algorithms to learn and adapt from the data.

Algorithm Creation and/or Pre-built Algorithms

It must allow users to develop custom machine learning algorithms and/or offer pre-built machine learning algorithms catering to users with varying levels of expertise.

Scalable AI Deployment

The platform must offer a robust infrastructure for deploying AI solutions at scale, ensuring that these solutions can be implemented and operated effectively within a business environment.

RapidCanvas Achievements

Being a momentum leader highlights our platform's accelerating growth. It signals rapid market adoption and increasing user enthusiasm, distinguishing us from the intense competition. This badge emphasises our dynamic rise and future-forward solutioning, gaining significant traction.

Being a high performer recognises how consistently and highly our users report their satisfaction with the platform and its offerings. It confirms our ability to reliably meet business needs and deliver substantial value. This badge highlights our proven track record as a dependable solution.

Being the easiest partner to do business with celebrates our dedication to a streamlined and positive customer journey. It reflects our commitment to simple processes and responsive support, ensuring effortless engagement for our users. This badge showcases our customer-first approach and ease of interaction.

G2 awards badges to recognize leading software platforms based on rigorous analysis of over 500,000 verified user reviews. These badges are earned through unbiased ratings, derived from authenticated user opinions and synthesized public data. G2's evaluation process identifies top-performing products demonstrating exceptional user satisfaction and significant market presence within their respective categories, using badges to signal software excellence to technology buyers.

RapidCanvas: Momentum Leader

G2's "Momentum Leader" grid placement signals exceptional growth and user enthusiasm for our platform. For customers who are researching the space to make their investments, this unbiased recognition highlights our rapid market ascent and future leadership within a fiercely competitive category. It validates our platform as a dynamic, top-rated solution poised for continued success and delivering sustained value.

What this means to our customers today:

✓ Rapid Growth

This grid highlights the significant positive momentum our platform is experiencing, indicating its increasing adoption and popularity. It clearly demonstrates that more and more users are recognising the distinct value of our product.

✓ Forward-Looking Indicator

As a momentum leader, our platform is identified as a forward-looking solution, poised to continue its upward trajectory and maintain its position as a leading innovator. It signals our commitment to continuous improvement and future-ready technology.

✓ Strong Market Presence

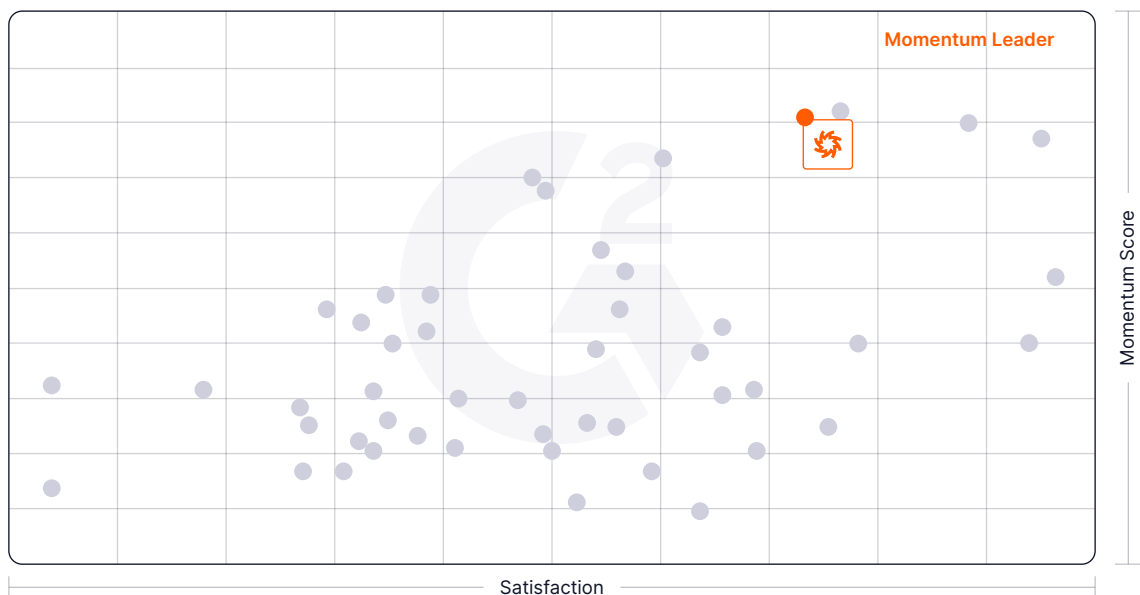

This grid positioning also demonstrates platform's credibility and market presence. It serves as a powerful validation point for anyone researching the DSML solutions space, and seeking a platform with proven market momentum.

✓ High Customer Satisfaction

Based on G2's user satisfaction scores and positive reviews, this grid positioning confirms that a substantial number of users are not just using our platform but are also highly satisfied with its performance and advanced capabilities.

✓ Competitive Edge

The grid positioning distinguishes our product from the competition. It assures to you that our platform is not only well-established but also dynamic and innovative, demonstrably outperforming established and big names in growth and positive user sentiment.

Scoring high on Relationships

G2's Relationship score are a key indicator of customer sentiment and the platform effectiveness. This score is calculated using G2's proprietary, patent-pending algorithm.

The Relationship score is derived from a comprehensive analysis of:

✓ **Ease of Doing Business**

Directly reflecting user reviews on the seller's business practices.

✓ **Likelihood to Recommend**

Aggregated from user reviews indicating customer willingness to advocate for the product.

✓ **Quality of Support**

Based on customer satisfaction with the product's support services, as reported in G2 reviews.

✓ **Volume of Reviews**

Acknowledging that a higher number of reviews enhances buyer confidence and provides a more statistically robust representation of user experience.

Ease of Business

Support

*Category Average

Among high performers

G2's High Performer Scores is derived from user reviews with explicit focus on customer satisfaction.

More specifically it deals with:

✓ User-focused scores

Ease of Use, Meeting Requirements, Quality of Support.

✓ General satisfaction scores

Likelihood to Recommend, Direction of Product.

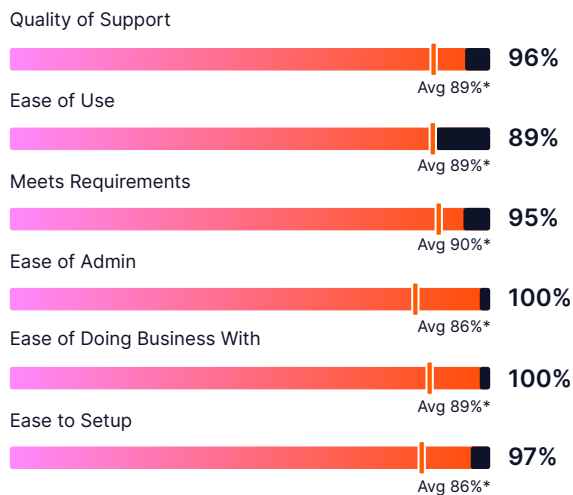

✓ Admin-focused scores

Ease of Admin, Ease of Setup, Ease of Doing Business With.

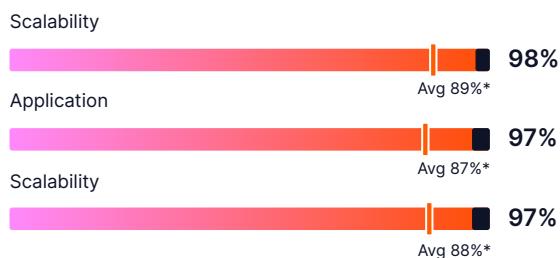

✓ Review Volume, Recency, and Quality

- Weighting is applied based on the number of reviews
- How recent they are, and
- Their thoroughness.

Customers love RapidCanvas

Solutioning

"RC understands the pain points and needs of the renewable energy industry, and their pre-configured AI solutions for various wind turbine use cases precisely meet our business needs."

"The insights from RC can be harnessed to make informed decisions to our end users, better target customers, and optimise various aspects of auto-related business dealer operations."

"Our data is very complex and massive, RC helped us to break down and build the ML model so it can be easily integrated to our products."

Data Science Expertise

"Their data science team was able to quickly grasp the nuances of our business and deliver meaningful insights for integration which has improved our operational efficiency and has impacted our bottom line in a meaningful way."

"The team is highly experienced, offering a wide range of solutions during the solution development and deployment course, making quality project delivery a top priority every single time!"

"Their streamlined processes and advanced algorithms enable them to tackle complex data challenges with unprecedented speed, giving clients the agility they need to stay ahead in today's competitive landscape."

Quality of Support

"Apart, from the product which in itself is amazing and super easy to use, the support from the RC team has been exemplary."

"Whenever I encountered any issues, the support team was responsive and knowledgeable, providing effective solutions in a timely manner."

"This level of support has been invaluable in ensuring a smooth experience with the platform."

Customer First Approach

"What truly sets RapidCanvas apart is their commitment to delivering solutions at a speed that is nothing short of astonishing."

"What I like best about the platform is its efficiency in accelerating the AI development process."

"RapidCanvas has been a pivotal partner in our digital transformation journey."

About RapidCanvas

RapidCanvas is the trusted partner for transforming your business with AI, pioneering the only hybrid enterprise AI platform that combines autonomous agents with human expertise. We make enterprise-grade AI accessible to all organizations, helping them unlock the hidden value trapped in their data without technical expertise or massive investment. Partner with us for an AI solution set and strategy that actually makes sense for your business, including:

Real Autonomy

Empowered decision-making without technical expertise through our conversational interface and no-code solutions.

Real Performance

Outcome-first intelligence that delivers 10X faster time to value with 80% reduction in implementation costs.

Real Reliability

Enterprise-grade security with validation by human experts, ensuring transparent, explainable AI decisions.

RapidCanvas works with industry leaders in manufacturing, retail and consumer goods, financial services, and infrastructure to drive real business transformation, not hypothetical AI hype. Recognized as a top 5 Data Science and Machine Learning platform by independent research firm G2 for customer satisfaction, RapidCanvas helps companies keep it real in the age of the artificial, because the most meaningful business transformation happens where artificial intelligence meets real partnership.
